Please describe your personality

I am a very curious person. I love to explore and learn, so I study and self-teach a lot. My curiosity has taken me to 31 countries so far, and earned me multiple certifications. I would describe myself as adventurous and creative. I like to draw, read, and play instruments. I'm disciplined and active. I am a loyal person, with close family relationships and a number of friendships which span back over a decade. Family is very important to me.

Do you wear or have you worn eyeglasses? Yes

Have you worn braces? No

Why do you want to become a donor?

I have taught and volunteered with children all around the world and met so many who were not embraced or cared for. I don't have any doubt that IP(s) who pursue DE IVF have put thought into parenting and that their child(ren) would be loved and cared for. I support LGBTQ+ and alternative family structures, and even personally consider adopting one day.

My first donation was an incredible process to be a part of, and I am so happy to see my first recipient couple happy in their parenthood, I'd love to help provide another family with the opportunity to have or add children to their families.

Being a donor is a big responsibility. It requires going to several doctor's appointments, taking injections and having minor out-patient surgery. Do you feel prepared to commit to this process? Yes

Are you open to being matched with all types of families regardless of sexual preference, marital status, ethnicity or sex of the egg recipient? Yes

If they request it, are you willing to meet your intended parents? Yes
