

Doctor of Medicine. Currently specializing in Pediatric Neurology

Catalina

Catalina is a warm, intelligent, and compassionate donor with Italian and Portuguese heritage and a background in medicine. Currently specializing in Pediatric Neurology, she combines academic excellence with emotional maturity and a genuine passion for helping families grow.

Raised in the countryside of Brazil, Catalina describes herself as positive, grounded, and deeply empathetic. Her motivation to donate stems from witnessing the emotional impact infertility can have on families through her work in healthcare.

Athletic, healthy, and family-oriented, she brings a rare combination of intelligence, warmth, and natural elegance.

Why do you want to become a donor?

As a doctor, I have seen how deeply infertility can impact families and how meaningful egg donation can be in helping them achieve their dream of having children. I also see this as an opportunity to support my own future and professional growth while making a positive difference in someone's life.

Being a donor is a big responsibility. It requires going to several doctor's appointments, taking injections and having minor out-patient surgery. Do you feel prepared to commit to this process?
