Motivation to Donate

Why do you want to become a donor?

I've donated in the past (~21 years old), I know the feeling of helping a family who doesn't have the ability to conceive on their own, and thought it was a wonderful feeling and it made me very happy. I know I am a good person so I think that positive traits get passed down, and I think this is a good quality that will be passed on for other families.

Being a donor is a big responsibility. It requires going to several doctor's appointments, taking injections and having minor out-patient surgery. Do you feel prepared to commit to this process?

Yes

Openness

Are you open to being matched with all types of families regardless of sexual preference, marital status, ethnicity or sex of the egg recipient?

Yes

If they request it, are you willing to meet your intended parents?

Yes

Are you open to meeting the child in the future if that is requested?

No

Are you open to exchanging future contact information with your intended Parents(s)?

No
