Personal Attributes**Please describe your personality**

"I am a very calm, polite, and kind person. I have great relationships with people, even though I was shy during my childhood and adolescence. Among my strengths, I can mention: humanity, organization, resilience, and patience. As for my weaknesses, I would say I am still quite naive (trusting people too much) and

I also often procrastinate in my daily life."

Athletic Abilities

Do you have any athletic abilities?

Yes

List of athletic abilities?

Balance, endurance, strength training

Motivation to Donate

Why do you want to become a donor?

"I am 27 years old and have no plans to have children for the next 5 years. My mother got pregnant with me, her first child, at 33. She always encouraged me to live life, achieve my goals, and then raise a child.

I have always been in favor of and willing to donate organs when necessary. It is part of my personality to think deeply about people and social issues. I would be very happy to be able to donate my eggs to a family, to be able to help someone experiencing difficulties with something that is available and healthy in my body."

Being a donor is a big responsibility. It requires going to several doctor's appointments, taking injections and having minor out-patient surgery.

Do you feel prepared to commit to this process? Yes

Openness

Are you open to being matched with all types of families regardless of sexual preference, marital status, ethnicity or sex of the egg recipient?

Yes

Please explain why

All human beings have the right to love. God is the symbol of love and faith!
Therefore, no sexual orientation, ethnicity, or sex is capable of preventing the creation of a family. I am against any type of prejudice!

If they request it, are you willing to meet your intended parents?

Yes

Are you open to meeting the child in the future if that is requested?

Yes

Are you open to exchanging future contact information with your intended Parents(s)?

Yes
