I want to become a donor because I know that many individuals and couples dream of having a family but are unable to do so without help. Being able to make a meaningful difference in someone's life is incredibly rewarding to me. I also appreciate the opportunity to help while receiving compensation, and I am committed to being responsible and honest throughout the entire process.

Being a donor is a big responsibility. It requires going to several doctor's appointments, taking injections and having minor out-patient surgery. Do you feel prepared to commit to this process?
